

Depth gauge STANDARD

Depth gauge STANDARD made of steel for accurate interior plastering
Designed for all types of cement-based plasters
Use with gypsum-based materials is only possible where humidity moisture presence is excluded

Material:

- zinc-coated steel

Features:

- Significant plastering time saving
- Accurate plaster thickness ensured
- For plaster layer thickness 6 or 10 mm

Instruction for use:

Before plastering, fix the profile to the wall and level with spirit level. The profile may be fixed mechanically or with mortar or special glue. Level the plaster with a plain wooden plank along the profile nose.

Packaging, storage and transport:

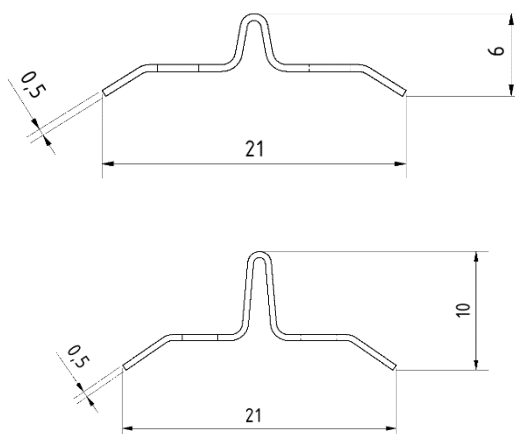

Store in a dry place in horizontal position to prevent the profile sagging.

Certification:

The product conforms and bears the CE mark pursuant to EN 13658-1 Metal lath and beads. Definitions, requirements and test methods. Internal plastering

Technical data:

Material	Zinc-coated steel
Sheet thickness [mm]:	0.5
Coating quantity [g/m ²]:	min. 275
Length [mm]	2600, 3000
Width [mm]	21
Height [mm]:	6 or 10
Class of reaction to fire	A1

Issued on 1 February 2016.

This update invalidates all previous versions of this technical data sheet. The specified product dimensions are nominal and may range within the permitted manufacturing tolerances.
